TECH

- Python: pandas, Django
- Full Stack Development: React, Express.js, Node.js
- OracleSQL, PostgreSQL, mysql
- GIT, JIRA, Confluence
- HTML, CSS, JS, SASS
- MS Office: Excel, VBA

LANGUAGES

- Polish (Native)
- English (C1)

SKILLS

- Maintainable coding
- SOLID principles
- Testing
- Inquisitive & eager to learn
- Big picture thinking, detail aware
- Running tabletop RPGs

Analytical Thinker & Problem Solver

I learned Python in my free time to better perform my duties at Nielsen. Then followed up with fullstack Kodilla codecamp. Now I want to utilize and develop these skills further while contributing to Your company's success.

EXPERIENCE

Subject Matter Expert Statistical Operations - NielsenIQ May 2022 - September 2024 (Spain team)

- I have automated many team's activities:
 - With a **single tool**, I **saved 20 hours per month and up to 20 hours in reworks or delays** caused by late manual error detection (Python, SQL).
 - I created smaller tools **reducing team workload on repetitive tasks**. My OracleSQL extractors, Excel UDFs, Python scripts and Excel templates saved my team hours every day.
- I codified „tribal knowledge” on day to day processes into SOPs and **achieved 95% documentation coverage**
- I conducted Root Cause Analysis and implemented corrections to **stop any repeat SLA violations**
- I created automated KPI reports
- I **rebuilt a team** when it lost 4 out of 6 members
- I standardized Cash&Carry service and **accelerated its internal delivery by 11 days** (from Day 14 to a Day 3)
- I **provided simple answers to external clients** and complex ones to internal clients

Senior & Standard Data Processing Specialist- Nielsen August 2019 - April 2022 (Spain team)

- I implemented **Amazon databases** in Spanish markets
- I rebuilt **Spanish Ecommerce** deliverables
- I took over activities from **both India and Spain** while synthezizing their separate activities into one flow

Lab Tech - Chemtech Krzysztof Januszkiewicz

January 2017 - July 2017

- QA and R&D: I have detected a faulty batch of filters saving company from contracting bad supplier

COURSES & OTHER

- **Full Stack Developer Course** by Kodilla (in progress)
- Finished **Advent of Code 2019 & 2021**

EDUCATION

Master's Degree in Chemical and Process Engineering Warsaw Universit of Technology

October 2012 - December 2021

- Master's thesis on nanoparticle synthesis
